

Comtek International Inc.

OFFSHORE TECHNOLOGY SERVICES

In the face of unpredictable events and changing demands, your business depends on its IT infrastructure. IT service must be delivered reliably and effectively — where and when the business requires service availability solution that insures that you meet those mission-critical needs by securing, automating and optimizing the IT infrastructure.

Over the last 12 years Comtek has been providing high-end computer services, both offshore to our Russian development center and on-shore, to focus on solutions for business of all sizes and industries. Our reputation for solving information technology problems remains excellent throughout our service to our customers. Offshore services are delivered in a very cost effective structure for our customers:

- To ensures proactive, reliable access to IT services
- Supports today’s heterogeneous infrastructures across mainframe and distributed environments
- Speeds mean time to resolution (MTTR) by quickly identifying and resolving issues affecting service
- Accelerates time-to-value through modular implementation based on industry best practices

With the broad range of solutions to manage the most complex, heterogeneous and dynamic IT environments, Comtek can unify and simplify the management of your IT infrastructure. From networks to systems, desktops to laptops, databases to Web services and more, we can help transform your IT organization from cost center to strategic partner.

Technology Services positions require technical qualifications in computer science, IT, and software engineering. Our technology professionals develop and implement solutions across architectures and platforms for clients in dozens of industries and sectors.
